 - Drought tolerant, heat tolerant, great for erosion control

TUFFY

High Impact
Low Maintenance

One of the latest entries into the collection, King Alfred is proving to be a great choice for a variety of applications. Blue-green, weeping foliage with the typical Dianella flowers in spring. Some key attributes include fast growth rate for quick establishment, a strong root system for excellent erosion control, great salt tolerance and respectable frost tolerance. Best in full sun with low irrigation.
