

# Dianella LITTLE REV™

Dianella revoluta 'DR5000' PP17,719

## Leaf:

- Blue-green, sword-like foliage
- Highly glaucous, particularly in dry environments.

## Habit:

- 1.5-2 ft H x 1.5 ft W; shorter in full sun
- Clumping to spreading perennial with a mounding habit at maturity.
- Zone 8-11; Evergreen to Zone 9.

## Apps:

- Commercial & Streetscaping
- Group, Border or Specimen Plantings
- Water-wise home Gardens
- Can be used in containers

## Bloom:

- Clusters of small purple flowers borne on branched peduncles that sit high above the foliage. Lighter bloom than other Dianella.

## Notables:

- LIKES - Dry conditions; Free-draining soil; Full/filtered sun
- DISLIKES - Humidity; Over irrigation; Planting too deep.
- Drought tolerant, heat tolerant, great for mass plantings

# TUFFY

High Impact  
Low Maintenance

Architectural appeal, beautiful foliage and a tough demeanor; this flax lily is perfect for low water, low maintenance landscapes. Slowly spreads by rhizomes so it's great for mass plantings but with a little maintenance, Little Rev can be pruned to create a very nice specimen or group planting. Can develop a leaf spot in high humidity situations so Little Rev is best suited for Western gardens.
